## INTRODUCTION

Tuberculosis morbidity and mortality data and information on hospital facilities are completed at various times throughout the year. In order to provide information as early as possible, tuberculosis statistics are published as data become available. This report is a summary of 1973 tuberculosis case data for states and cities and tuberculosis death data for 1970. Later in the year the following report will be issued:

*Reported Tuberculosis Data, 1973*, including detailed analyses of statistics for the United States.

### *Definitions*

*Cases*, as the term is used in this report, relate to active tuberculosis cases not previously reported.

*Deaths* from tuberculosis are identified in the cause-of-death statistics, published by the National Center for Health Statistics.

*Rate*, either case rate or death rate, is the number per 100,000 population.

### *Sources of Data*

**Morbidity:** Annual Tuberculosis Reports, CDC 5.1393, were submitted to the Center for Disease Control by each state health department and by health departments of cities with 250,000 or more population. State reports included limited data for all counties within each state (to be analyzed later) and for cities of 100,000 or more population.

**Mortality:** Official tuberculosis mortality statistics for the United States are compiled by the National Center for Health Statistics. At the time of publication of this report, only provisional deaths based on the NCHS 10 percent sample were available for 1972 and 1973.

**Population:** State population estimates are from the Bureau of Census, Current Population Reports, Series P-25, No. 508, November 1973. Age, race and sex population estimates for individual states were prepared by the Tuberculosis Control Division (CDC), taking into account estimates of the Bureau of the Census. For cities, population estimates were obtained mainly from the respective local and state authorities.

**TABLE 1**

*New Active Tuberculosis  
Cases and Deaths,  
United States, 1953-1973*

| Year | New Active Cases |      |          |       | Tuberculosis Deaths |      |          |       |
|------|------------------|------|----------|-------|---------------------|------|----------|-------|
|      | Number           | Rate | % Change |       | Number              | Rate | % Change |       |
|      |                  |      | Number   | Rate  |                     |      | Number   | Rate  |
| 1953 | 84,304           | 53.0 | ..       | ..    | 19,707              | 12.4 | ..       | ..    |

\*Not included in totals. Figures shown by sex are for all races.

Notes: (1) Rates enclosed in parentheses have a population base under 10,000.  
(2) Cases with race or sex not specified distributed proportionately.  
(3) n.c. = No cases.  
(4) (..) = Not available.
